

CABI Forest Science Collection

The complete forestry resource covering forest trees, wood science and agroforestry

The **Forest Science Collection** is an essential resource for foresters, scientists, environmental consultants, policymakers and others actively involved in research or decision-making in agroforestry, forestry, wood science, and the forest and timber industries.

It supplies bibliographic information and abstracts for all aspects of agroforestry, forestry, tree biology, land use and wood science as well as climate change effects, deforestation, forest logging and urban forestry.
